

**FOR IMMEDIATE RELEASE**

## **OncoQuest to Present at BIO CEO & Investor Conference**

**EDMONTON, ALBERTA, February 12, 2018** OncoQuest Inc. (“OncoQuest” or the “Company”), a biopharmaceutical company focused on the development and commercialization of immunotherapeutic products for the treatment of cancer, today announced that it will present at the BIO CEO & Investor Conference to be held February 12-13 at the Marriott Marquis in New York City.

Hany Awadalla, Senior Vice President and Chief Financial Officer, will provide an overview of the Company’s business and will be available to participate in one-on-one meetings with investors who are registered to attend the conference.

Presentation Date: Monday, February 12th  
Presentation Time: 10:00AM (Eastern Time)  
Presentation Room: Brecht  
Location: Marriott Marquis

### **About oregovomab**

Oregovomab is OncoQuest’s high affinity monoclonal antibody (Mab B43.13) that is designed to bind to the tumor associated antigen CA125 (also designated MUC16) and initiate a cascade of immune responses against this glycoprotein. CA125 is expressed in epithelial ovarian cancer on the tumor surface, but is also shed into the circulation. OncoQuest believes that carboplatin paclitaxel based chemotherapy used in front line treatment in a precisely scheduled combination with oregovomab can improve outcomes relative to chemotherapy alone and is currently exploring the role of select immune adjuvants and checkpoint inhibition to assess oregovomab’s application in advanced disease settings.

### **About OncoQuest**

OncoQuest is a subsidiary of Quest PharmaTech Inc. (TSXV-QPT) (“Quest”), and is a private biopharmaceutical company focused on the development and commercialization of immunotherapies for cancer. OncoQuest’s technology platform includes a panel of tumor antigen specific monoclonal immunoglobulins including CA125, MUC1, PSA and Her2/neu; and the application of combinatorial immunotherapy to enhance tumor specific immunity and clinical outcome. OncoQuest’s lead product is oregovomab for the treatment of ovarian cancer that is currently undergoing multiple Phase 2 clinical trials. OncoQuest’s MUC1 program has already undergone a Phase 1 clinical trial in breast cancer patients, and its development is being led by OncoVent Co. Ltd., OncoQuest’s joint venture partner that has licensed the rights of the immunotherapy technologies in the territory of Greater China. OncoQuest’s next-generation products are based on immunoglobulin E licensed from UCLA, Stanford University and Advanced

Immune Therapeutics, Inc. These antigen-specific monoclonal IgE antibodies are currently in preclinical development.

***Forward Looking Statements***

This press release includes forward-looking statements. In some cases, forward-looking statements can be identified by terminology such as "may," "should," "potential," "continue," "expects," "anticipates," "intends," "plans," "believes," "estimates," and similar expressions. These statements are based on management's expectations and assumptions as of the date of this press release and are subject to a number of risks and uncertainties, many of which are difficult to predict that could cause actual results to differ materially from current expectations and assumptions from those set forth or implied by any forward-looking statements. The information in this release is provided only as of the date of this release and the company undertakes no obligation to update any forward-looking statements contained in this release based on new information, future events, or otherwise, except as required by law.

Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
